Beschrijving

Powered by a quad core 64-bit ARM processor and 512MB of SDRAM, the Zero 2 is five times as fast as the original Raspberry Pi Zero - all built into the same tiny form factor, making it perfect for a range of smart home applications and IoT projects

- 1GHz 64-bit quad-core Cortex A53 processor
- 512MB SDRAM
- 2.4GHz 802.11b/g/n WiFi with shielded enclosure
- Bluetooth 4.2 Low Energy (BLE) with onboard antenna
- MicroSD card slot, CSI-2 camera connector
- Mini HDMI port and Micro USB OTG
- OpenGL ES graphics V1.1, 2.0
- H.264 MPEG-4 decode (1080p Full HD @30fps), H.264 encode (1080p Full HD @30fps)
- 40-pin GPIO header footprint (unpopulated)
- Board Dimensions: 65x30mm

Toepassingen

Embedded Design & Development, Electronics Design, Hobby & Education, Communications & Networking, Consumer Electronics, IoT (Internet of Things)

Productinformatie

Artikelnummer	RBPMN/ZERO
Merk	RASPBERRY PI
Is on Sale	Nee
