Everhardt 'Super Tiger' series – made in Texas, USA

The STT-series have a tunable tip for tuning between 26-29 MHz. These rugged antennas are top loaded, helically wound around a 3/8 fiberglass rod especially designed for high power radios

**Features:**

- Full wave antenna
- 1500 Watt 'Talking Power'
- 'Tunable tip' tunable between 26 - 29 MHz
- Exclusive 'VibraSorb' anti-breakage design

Frequency range: 26- 29 MHz tunable

## Electrical data

- Electrical type: Top loaded / Full wave antenna
- VSWR: <1.5:1 (40 channels)
- Power peak: 1500 Watt
- Impedance: 50 Ohm
- Polarization: Linear vertical
- Cable length: Needs an 18 foot (550 cm) antenna cable for a good SWR (not included)

## Mechanical data

- Materials: Fiberglass
- Height: 900 mm
- Weight: 295 gram
- Mounting type: On 3/8 female (stud) mount
