Beschrijving

Features:

- **Wave-shaped heat sink fins:** Increase the heat dissipation area, thereby improving the heat dissipation capacity.
- **No noise:** No need to install a fan, completely 0 noise;
- **Simple installation:** Use M2.5*6 nylon screws to fix from the bottom, easy to install and remove.
- **Good heat dissipation:** The stress test can meet the full-load stress test of the Raspberry Pi 5 **3-core** (room temperature 22 degrees, test time 20 minutes), which is a supplement to the active radiator and can meet most usage scenarios.
- **Model:** H509
