Beschrijving

Application

SACX0307-1000 (Sn99Ag0,3Cu0,7) is lead-free alloys (ULL) which are suitable as a replacement for Sn63Pb37. The copper-free variant SACX0300-1000 is used as a refill in order to stabilize the Cu content.

Features

- Ultra low lead version
- Excellent solderability
- Very good wetting
- Low scratch formation
- Long life in comparison to thermal fatigue properties

Technical Specifications

Alloy: Sn99,7Ag0,3

Melting Point: 221...230[°C]

Productinformatie

Artikelnummer	SACX030010
Merk	ALPHA-COOKSON
Is on Sale	Nee
