Features

Accurate, fast and safe stripping of all common round cables of 4...28mm Ø

Easy, fast and exact due to infinitely variable adjustment of the cutting depth preventing damage to the inner conductors

Rotatable inner blade which automatically adjusts from circular to longitudinal stripping, therefore longer cable pieces can be stripped in one step.

Hook blade can steadily jut out or be immersed into the tool and then be fixed in both positions due to reasons of operational safety

Productinformatie

Artikelnummer	AWM-S4-28
Merk	WEICON
Is on Sale	Nee
