Beschrijving

Application

For effective ESD safe desoldering and repair of soldering joints eliminating additional cleaning. The braid is put onto the joint which has to be soldered and heated with a soldering iron. The desoldering braid then absorbs the liquid tin.

Features

Fast and effective desoldering
A special halide-free \"No Clean\" flux
Residues are minimal, non-corrosive and non-hygroscopic
ESD-secure wick
Heat resistant layer, vacuum packed
Very durable
Suitable for lead-free soldering

Productinformatie

Artikelnummer	DSL080ESD
Merk	STANNOL
Is on Sale	Nee
