Beschrijving

Features

- Halide-activated natural resin fluxes
- High activity, good spread and high residue reliability
- Flux residues - can be left on the PCB
- High spread speed
- For soldering copper, brass, silver, as well as nickel, silver and tin surfaces
- Hand and robot soldering

Technical Specifications

- Melting Point: 217°C
- Flux Type (IEC 61190-1-3 ROM1): 1.1.2.B
- Flux Content: 2,5%
- Corrosive Effects (DIN 8516): None
- Alloy (ISO 9453:2006): S-Sn95Ag3.8Cu1/713
- Flux Core: 1 Core

Productinformatie

Artikelnummer	SLV13/1002
Merk	STANNOL
Is on Sale	Nee
