**Beschrijving**

---

Structure-borne sound converter for bass frequencies. The units are attached to a surface which is able to resonate, which causes it to oscillate (e.g. a panel of a car body, the base construction of a settee etc.). No enclosed cabinet is required. Using the BS 130 4 OHM, this enables the lowest bass frequencies, such as those used for effects in films, to be reproduced in such a way that they are felt through the body rather than heard.

Rated power 50 W  
Maximum power 100 W  
Nominal impedance Z 4 Ohm  
Resonance frequency  $f_s$  25 Hz  
Net weight 1,2 kg

## Productinformatie

---

Artikelnummer	BS130
Merk	VISATON
Is on Sale	Nee
