# Product specification

The LIFE wireless weather station provides you with useful information about your home and garden. The clear display makes it easy to find your way around: the room climate appears in the coloured house under the time and date. The outside temperature and humidity are marked with a stylized tree and symbols show the current weather.

People spend at least two thirds of their lives indoors. Whether we feel well and comfortable will largely depend on the quality of the indoor air. Rooms that are too humid favour mould growth, but air that is overly dry also damages our health.

With the LIFE wireless weather station, you can keep an eye on the indoor temperature and humidity and control the room climate through targeted heating and ventilation.

The external values are determined via a separate radio transmitter, which is set up outdoors in a protected place. With a range of up to 60 m, they transmit the values directly to the LIFE weather station. Two more transmitters can be connected as an option.

The maximum and minimum values are saved and retrieved with a button. All buttons work with sensor touch operation. It is sufficient to just touch the sensor to activate it. The display light is also triggered this way.

The simple and clear design of LIFE fits into any surrounding, regardless of whether the weather station is hung or placed elsewhere.

## Function

- Wireless transmission of outdoor temperature and humidity via transmitters (max. 60 m)
- Indication of indoor temperature and humidity
- Max.-min.-function
- Weather forecast (based on the change in humidity levels)
- Clock with date
- Display with backlight

## Technical data

Measuring range temperature outdoor	-30...+70°C (-22...+158°F)
Delivery contents	Base station, thermo-hygro transmitter, instruction manual
Measuring range humidity	20...95%
Maximum range	60m
Maximum amount of transmitters	3
Transmitter included in delivery	30.3241.02
Transmission frequency	433 MHz
Measuring range temperature indoor	0...+50°C (+32...122°F)
Material	Plastic
Assembling	Wall mounting or freestanding
Power consumption	Batteries
Batteries	3 x AAA 1.5 V (base station), 2 x AA 1.5 V (transmitter)
Batteries included	No

Dimensions	(L) 138 x (B) 28 (67) x (H) 125 mm
Weight	198g

## Productinformatie

---

Artikelnummer	35115301
Merk	TFA
Is on Sale	Nee
